Timber Windows

Timber Windows

Combining the best in specification and aesthetics our new range of high performance Timber Windows offer an excellent upgrade solution to an energy efficient timber window.

The minimalistic flush profile and crisp white finish are based on exacting Scandinavian designs and specifications and have been adapted to suit the rigours of the UK market.

Not only does the product come with a Window Energy Rating (WER) of B it also achieves a U-Value of 1.4 W/m<sup>2</sup>K. CE Marking ensures our windows comply with the Construction Products Directive. The range also carries the prestigious Q Mark from BM TRADA.

All windows come fully finished in white and fully glazed with high security Espagnolette locks, aluminium drained and vented bottom beads and easy clean projecting friction hinges. All windows are manufactured from engineered timber for greater strength and stability.

The range is tested and adheres to all of the stringent British Standards relating to Timber Windows including:

- BS 644:2009
- BS EN 14351-1:2006
- BS6375 Parts 1, 2 & 3 (2009)
- BS EN 1279 Parts 2 & 3 (2004)

Our Timber Windows all come with stringent guarantees to give peace of mind that the windows will last and perform to the correct standard for many years to come.

## Guarantees

- 30 Years against Rot and Fungal Decay
- 10 Years against Manufacturing Defects
- 10 Years on Factory Painted Finish
- 10 Years against Double Glazing Unit Failure

## Building Regulations

Current Building Regulations call for a minimum U-Value of 1.6W/m<sup>2</sup>K or Window Energy Rating of C. At XL we strive to provide the most energy efficient products available and as such our windows far exceed the minimum requirements with a U-Value of 1.4W/m<sup>2</sup>K and Window Energy Rating of B. This means a superior window with enhanced specification features at a cost effective price.
